

Alliance Française
Perth

smarter teaching flexible learning

BUILDING FUND
CAMPAIGN 2026

about us

Alliance Française de Perth is the home of French language and culture in Western Australia. Founded in 1911 and proudly celebrating its 115th anniversary this year, it is a registered Australian charity and not-for-profit association, and one of the most significant Alliances in the Australian network.

For 115 years, we have brought the best of French language and culture to our community. With over 1,000 students each year, 7 classrooms, and 43,000 course hours sold annually, the Alliance is thriving. And to ensure it continues to offer the very best, it is time to renew and modernise our teaching equipment.

about our project

Despite our strong reputation, our classrooms today have no functioning interactive technology and ageing computer equipment. This campaign funds the modernisation of our classrooms, giving our teachers the tools they deserve and our students the experience they expect.

Flexible Learning
for all of WA

classrooms
tailored for today
and tomorrow's
learners

fundraising goal **AUD \$50,000**

Our current classrooms rely on static whiteboards and computers that are well past their useful life. This is not simply a comfort issue: our aging equipment directly affects the quality of teaching our students receive and the confidence our teachers have in the classroom. Modernising this equipment is an investment in better outcomes for both teachers and learners, as well as a foundational requirement for delivering language education at the standard our reputation demands.

INTERACTIVE CLASSROOMS

smartboards & computers

why Smartboards?

Research shows that interactive learning increases motivation, participation, and academic achievement.

what does it allow?

Interactive smartboards let instructors control digital content directly on the board while students collaborate in real time.

help us bring learning to life

Your support can transform our classrooms with Smartboard technology and new, up-to-date computers, empowering students to engage, collaborate, and succeed in ways traditional tools simply cannot match. By investing in Smartboards, you're not just funding equipment, you're opening doors to dynamic, future-ready education for hundreds of students each year. Join us in creating classrooms where every lesson inspires and every student thrives.

***Your support brings world-class,
interactive education to our students.***

Western Australia is the largest state in Australia and one of the most geographically dispersed. HyFlex enables us to include FIFO workers, rural and regional residents, Margaret River learners, francophiles in the Great Southern – everyone who have long been out of reach. Instead of learning alone, they gain a live class, shared momentum, and a genuine sense of belonging that learning apps and private tutors simply cannot provide. For Perth metro residents, attendance stays flexible, even when life intervenes. HyFlex opens a new market while strengthening the vibrant community at the heart of our mission.

LEARNING
ADAPTS
TO LIFE,

HYFLEX

flexible learning for all of WA

what is HyFlex?

With HyFlex (Hybrid-Flexible) learning, student can choose how they attend: in person, live online or recorded online.

how does it work?

HyFlex works by capturing the live class with a room camera, boundary-mics, and a shared digital workspace.

support us in opening French learning to all

Your support ensures that access to French language and culture remains inclusive, resilient and profoundly human. HyFlex is, for us, about keeping French language and culture alive, accessible and relational regardless of life circumstances. Learners stay connected to their teacher and classmates, ensuring they remain part of the community rather than being left behind. It is a commitment to access, equity and student success.

***Your contribution opens the doors
of learning wider than ever before.***

impact of your gift

student retention

Flexibility removes the leading cause of mid-term dropout among adult learners due to scheduling conflicts. Students are less likely to drop out.

teaching quality

Our teachers gain the tools to deliver levels at the level our reputation demands: interactive, multimedia and fully engaging.

wider reach

FIFO workers, regional WA residents and frequent travellers can access AFP courses from anywhere.

institutional standing

AF Perth joins AF Dublin, Hong-Kong and Paris as a fully HyFlex-capable institution, strengthening our place in the global AF network.

what your donation funds

investment breakdown

HYFLEX STUDIO	\$12,000
1 Interactive Smartboard	
1 Yealing A40 Meetingbar	
1 Computer	
1 TV	
1 Trolley
